

**Features/Applications**

GREMRING® SYSTEM is a pre assembled system consisting of a clip mounted in a heat shrinkable collar. The heat shrink collar can accommodate a wide range of clip / clamp types, e.g. clip clamps, spring clamps, ear clamps, screw clamps, etc. GREMRING® SYSTEM offers an accurate positioning of the clip on the hose prior to final fastening. GREMRING® SYSTEM system is widely used on fuel lines and on rubber hoses within the automotive sector.

**Various**

Standard colours: Black for the heat shrink tubing. Other colours available on request.

**Dimensions**

These parts are tailor-made to each customer's application.

GREMTEK's engineering department has significant application and design expertise. The designer teams will work with the customer to identify the best design in order to achieve the specified requirements.

**GREMRING® SYSTEM**

**Recommendations for use**

Position the GREMRING system on the pipe and shrink it under the following conditions:

- Shrink type: oven or shrinking tunnel
- Shrink temperature: ~ 150°C
- Shrink time: ~ 5 min
- Speed of the tunnel: to adapt over time and temperature
